The Powerful Graphical Manager for Your Storage Systems

File & Disk Space Management At Its Best

TreeSize analyzes data on every storage system that is accessible via the network. The results are visualized in the form of meaningful statistics and diagrams. The market-leading file and disk space manager provides a wide range of file management options and helps to organize and manage all storage systems efficiently.

Selected Main Features

Cross-system Disk Space Management
· Scan Windows, WebDAV and SharePoint Servers, Amazon S3 as well as drive images in VHDX, VHD and ISO format
· Scan Linux machines via SSH and smartphones via USB
· Display of the folder sizes including all subfolders, which can be broken down to file level
· Detailed view with single files and much additional information

Powerful File Search
Flexible and easy to configure
· Fully customizable file search with many supported search criteria
· Search for files with long paths
· Integrated duplicate file search, optionally with MD5 or SHA256 checksums
· Deduplication using hardlinks
· Search of several drives at the same time or of complete network environment

Versatile Reporting
All Information at a glance
· Export of scan and search results to Excel, PDF, HTML, XML, text/CSV file, clipboard or email
· Numerous visualization formats: pie, bar or treemap chart
· Detailed statistics about file types and file owners for every branch.
· List of the 100 largest files
· Display of occupied disk space broken down by age
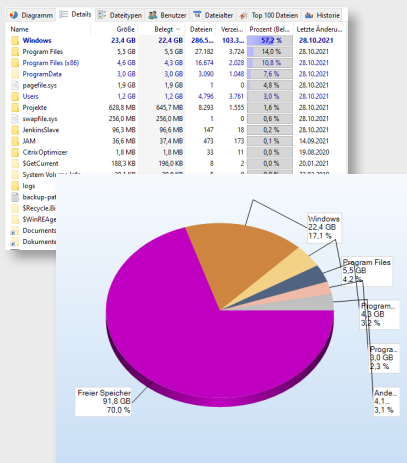

Flexible File Manager
Manage files with one click
· Archive search results in a ZIP archive
· Move or copy files to another drive
· Delete selected item or move it to the recycle bin
· Rename multiple files at once
· All operations can be automated and executed regularly with the command line parameters

TreeSize v8

Additional Features

✅ Compare a saved XML file with the current state of the file system and identify strongly grown folders - TreeSize shows the difference of the scans.

✅ TreeSize supports multithreading: Examine several directory trees at the same time and view the results already during the examination.

✅ Full NTFS Support: Hardlinks, Alternate Data Streams, file based NTFS compression are taken into account. NTFS Permission can be reported and exported, separated by inherited and own permissions.

✅ Very customizable views and reports, the displayed columns and their order can be configured individually.

Your Benefits:

- Analyze data on any storage system
- Get a quick and thorough overview of storage resource usage
- Archive, copy and move files
- Efficiently manage and clean up storage systems
- Schedule scans and let them run automatically

✅

Customer Voice:

„I have been using TreeSize for many many years and totally love it! One of the first softwares I install on every new system I come to.

Cheers and thanks for a super great software!"

Jacob Danell, Ember Light
